TS

SUMMARY

- Accomplished data engineering lead with expertise in designing scalable data architectures and implementing efficient ETL processes for large-scale data pipelines.

PROFESSIONAL EXPERIENCE

Senior Manager, Data Engineering

ABC

📅 02/2020 - Present 📍 Scottsdale, AZ

- Led the migration from SQL Server to Redshift using Amazon Athena & S3, resulting in an annual cost savings of \$68,000 & increased performance of 11%
- Led efforts to address high-priority data quality issues that resulted in a 30% reduction in data-related issues across various pipelines.
- Leading a team of 5 senior data engineers, increasing productivity by 20% in 6 months through the implementation of agile framework.
- Built & maintained the data pipeline with up-time 99.9 % while ingesting transactional data across 5 data sources using Apache Spark, Nifi & Hive.

Manager, Data Engineering

Wolf Inc

📅 01/2016 - 01/2020 📍 Scottsdale, AZ

- Lead a team of developers to build a proprietary CRM system for enterprise and its strategic partners, optimizing sales process and increasing sales revenue by 24%
- Curated a \$2M business implementation project that saves ~ \$3.5M on operational inefficiencies between sales and development departments annually
- Collaborated with strategic manufacturing partners to develop an effective onboarding system, reducing the sales cycle by 3 months for global enterprise clients

Senior Data Engineer

Reilly Group

📅 04/2015 - 12/2015 📍 Scottsdale, AZ

- Increased sales in manufacturing and business intelligence segments by 14% over 6 months
- Integrated Tableau reporting system into BI sales workflow, which led to 23% increase in post-meeting inquiries for technical sales department
- Streamlined post-sales support to increase customer retention rate among enterprise clients by 27%
